**Contract 2020-08
Scott Road Bridge, Design-Build
PID#108835**

Addendum No. 05

The design shall meet section 308.2.3.4 for the most recent Ohio Department of Transportation Bridge Design Manual, which states "Use a minimum of 4 pre-stressed I-beams stringer lines on bridges carrying vehicular traffic."

- Q1. Section 14.10b states that anything removed for construction should be replaced, including trees, landscaping, etc. Please clarify the intent of this statement as there are existing trees and privately maintained landscaping within the proposed RW and temporary easement limits. If we are to replant trees, is it 1 for 1 replacement by tree count or does the caliper of the tree need to be considered in the replacement?
- a. The intent is not to replant trees and shrubs.
- Q2. Are sleeper slabs required?
- a. No.
